Else GroupP are stored in GroupPList when create instance store DbEntity to true then only Group are stored in GroupList depending on rights. depending on rights. can be set. addGroupP will add Group in Group list corresponding to the Rights. to retrive Groups use: - getNoRightGroups() - getModifyGroups() getWriteGroups() - getRootGroups() getReadGroups() - getSGroups() - getRootGroups()

addGroup will add Group in objArray.

getListIterator()

To retrieve Groups use:
